Vote for WOT in About.com's Reader's Choice Award

The race is on to win bragging rights as the Best Security and Privacy add-on. For the first time, About.com's Computing Channel is having a **Reader's Choice Awards** which honors the best browsers and browser-related software. During January, thousands of nominations were submitted by readers in a wide variety of categories including Best Privacy/Security add-on. WOT safe browsing tool has qualified as a finalist!

Get a faster, new browser

We are excited about the new browser in town. It's cool, sleek, and oh, so fast. If your browsing experience has gotten a bit sluggish lately, consider downloading Google Chrome™.

WOT has been working with Google since the beta and developer versions of Chrome. Now that they have released the stable version, everyone can test drive this little beauty. Make sure you visit their extensions gallery to add WOT and your other favorite add-ons.

Update your browser or try a new one

When was the last time you updated your browser? Or tried something new? Old and outdated browsers have a greater risk for Internet threats and don't follow new web development standards. Outdated browsers such as Internet Explorer 6 don't follow current web standards which

affects the quality of websites rendering; have security issues; are full of bugs; and are incompatible with much of the new technology on the Internet.

Find your browser version

1. Open your browser
2. Click on *Help* and then scroll down to **About** (Internet Explorer, Mozilla Firefox, etc.)
3. The window that opens will show you which browser version you are using. If your version is older, it's time to make a change.

Browser choices that support add-ons like WOT:

Firefox is a longtime favorite for fans of add-ons and themes. [Download Firefox 3.6](#)

Google's new **Chrome** browser runs webpages and extensions with lightning speed. [Download Google Chrome 4](#)

This version of **Internet Explorer** is faster and safer than its predecessors. [Download Internet Explorer 8](#)

Other browser choices

Safari and Opera don't currently allow browser extensions in the same way as Firefox and Internet Explorer do, and therefore, providing WOT for these environments is not feasible. However, as a response to requests from our users, we have created a WOT bookmarklet that brings at least some of the functionality to the users of these two popular browsers.

WOT on the Web

One of WOT's remarkable members wrote this blog posting. Read [Web of Trust: prevention is better than cure](#) from Delan Azabani's **the bit bucket**.

The blogosphere has been buzzing with **Chrome** news lately. WOT made it on everyone's list of best extensions.

Mashable's popular writer Kristen Nicole suggests the best Google Chrome add-ons

to download and install in her article for ToMUSE, [Great Google Chrome Extensions And Addons](#).

PC World's Julie Bort highlights 10 of the most productive and downright fun add-ons available for

Chrome in this pretty slideshow, [Top 10 Chrome Browser Add-ons](#).

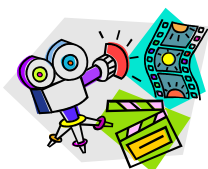

LifeHacker dug up 13 productive, annoyance-fixing, feature-adding extensions that

you should consider adding to your collection. Of course, the list includes WOT. [Make the Most of Chrome with These 13 Excellent Extensions](#)

If you have upgraded your operating system to **Windows 7**,

[Essential Windows Tricks](#) by Rick Broida of PCWorld will help you get the most out of it. Installing WOT is one of the tricks he suggests.

Videos explaining how to use WOT for Chrome are popping up too. These videos are very well done. Thanks to all those who have put so much time and effort into it.
